**Cannabinoids: 168 (Handbook of Experimental Pharmacology)** Roger G. Pertwee (Ed.)

The present book is an outstanding summary of many aspects of cannabinoid research. It provides current knowledge about the pharmacology and therapeutic potential of cannabinoids as well as knowledge about the pharmacology, physiology, and pathology of the endogenous cannabinoid systems. The chapters are written by scientists who have made or are still making major contributions to the field. This book may well help generate novel ideas on how to approach the study of emotions.
