Diagnostic Pediatric Hematopathology

Diagnostic Pediatric Hematopathology

Diagnostic Pediatric Hematopathology is unique in providing an accurate and up-to-date guide to the diagnosis of benign and malignant hematologic disorders of childhood. The text discusses the development of the hematopoietic and lymphoid systems - and how this affects normal and abnormal findings in children at various ages. Also examined are the morphologic, immunophenotypic, cytogenetic, and molecular genetic characteristics of most pediatric-specific hematologic diseases. This is an excellent reference that ensures accurate diagnoses when evaluating peripheral blood, bone marrow, and lymph nodes of children. The text is written by a team of experienced pediatric hematopathologists and clinical scientists drawn from major academic children's hospitals in the United States, Europe, and Canada. It will be a valuable tool in the every day practice of pathologists, pediatric pathologists, and hematopathologists, and a ready educational resource for fellows, pathology residents, medical students, clinical scientists in the field, and pediatric hematologists/oncologists.
