Rare Earth Magnetism: Structures and Excitations (International Series of Monographs on Physics)

Jens Jensen, Allan R. Mackintosh

This monograph presents a unified and coherent account of an important, focused area of rare-earth magnetism -- magnetic structures and excitations -- which both reflects the nature of the fundamental magnetic interactions and determines many of the characteristic properties of metals. The authors concentrate on the essential principles and their applications to typical examples, generally restricting the discussion to the pure elements and considering alloys and compounds only when they are instructive in illuminating particular topics. Both authors have been involved for some time in the effort that has been made in Denmark to study, both theoretically and experimentally, the magnetic structures and especially the excitations in the rare earths. This account of the subject represents the result of their experience, and it has been written in the hope that it will be useful not only to those who have a special interest in rare-earth magnetism, but also to a wider audience of physicists and condensed matter scientists interested in the techniques and achievements of modern research in magnetism.

From reader reviews:

Stephanie Wilkes:

This Rare Earth Magnetism: Structures and Excitations (International Series of Monographs on Physics) is great book for you because the content that is full of information for you who also always deal with world and get to make decision every minute. This particular book reveal it information accurately using great organize word or we can declare no rambling sentences in it. So if you are read this hurriedly you can have whole details in it. Doesn't mean it only provides you with straight forward sentences but tough core information with splendid delivering sentences. Having Rare Earth Magnetism: Structures and Excitations (International Series of Monographs on Physics) in your hand like obtaining the world in your arm, information in it is not ridiculous one particular. We can say that no publication that offer you world within ten or fifteen moment right but this e-book already do that. So , this really is good reading book. Heya Mr. and Mrs. active do you still doubt which?

Paul Andrews:

The book untitled Rare Earth Magnetism: Structures and Excitations (International Series of Monographs on Physics) contain a lot of information on the item. The writer explains your girlfriend idea with easy method. The language is very clear and understandable all the people, so do not necessarily worry, you can easy to read the idea. The book was written by famous author. The author provides you in the new period of literary works. It is easy to read this book because you can please read on your smart phone, or device, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site in addition to order it. Have a nice go through.

Elsie Hawkins:

A lot of guide has printed but it takes a different approach. You can get it by world wide web on social media. You can choose the most beneficial book for you, science, witty, novel, or whatever by means of searching from it. It is called of book Rare Earth Magnetism: Structures and Excitations (International Series of Monographs on Physics). Contain your knowledge by it. Without causing the printed book, it could possibly add your knowledge and make anyone happier to read. It is most essential that, you must aware about reserve. It can bring you from one spot to other place.

Gene Conley:

What is your hobby? Have you heard which question when you got students? We believe that that problem was given by teacher with their students. Many kinds of hobby, Every person has different hobby. And you know that little person including reading or as studying become their hobby. You have to know that reading is very important along with book as to be the factor. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You see good news or update concerning something by book. Amount types of books that can you choose to adopt be your object. One of them is Rare Earth Magnetism:

Structures and Excitations (International Series of Monographs on Physics).
