Studies in Natural Products Chemistry: Stereoselective Synthesis (Part K): 18 Atta-ur-Rahman

In Volume 18 of this well-established series, Professor Atta-ur-Rahman again brings together the work of several of the world's leading authorities in organic chemistry. Their contributions demonstrate the rapid, ongoing development of this field by illustrating many of the latest advances in synthetic methods, total synthesis, structure determination, biosynthetic pathways, and biological activity.

The opening chapter presents an overview of strategies for the synthesis of several classes of natural products with an emphasis on complex polycyclic systems. Subsequent chapters discuss the synthesis of specific classes of compounds, including morphine, polyketides, acetogenins, nonactic acid derivatives, complex spirocyclic ethers, α -lactam and pyridone derivatives, inositol phosphates, sphingolipids, brassinosteroids, Hernandia lignans, and dimeric steroidal pyrazine alkaloids. Finally, the ever stronger links between chemistry and biology are reinforced by chapters on the origin and function of secondary metabolites, bioactive conformations of gastrin hormones, and immunochemistry.

From reader reviews:

James Kostka:

Playing with family in a very park, coming to see the ocean world or hanging out with pals is thing that usually you may have done when you have spare time, and then why you don't try thing that really opposite from that. 1 activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Studies in Natural Products Chemistry: Stereoselective Synthesis (Part K): 18, you may enjoy both. It is fine combination right, you still wish to miss it? What kind of hang-out type is it? Oh come on its mind hangout people. What? Still don't have it, oh come on its known as reading friends.

Clifford Roselli:

Is it you who having spare time in that case spend it whole day through watching television programs or just laying on the bed? Do you need something new? This Studies in Natural Products Chemistry: Stereoselective Synthesis (Part K): 18 can be the reply, oh how comes? It's a book you know. You are therefore out of date, spending your extra time by reading in this fresh era is common not a geek activity. So what these guides have than the others?

Maria Simmons:

As we know that book is essential thing to add our knowledge for everything. By a reserve we can know everything we really wish for. A book is a pair of written, printed, illustrated or blank sheet. Every year had been exactly added. This publication Studies in Natural Products Chemistry: Stereoselective Synthesis (Part K): 18 was filled regarding science. Spend your spare time to add your knowledge about your scientific research competence. Some people has different feel when they reading a book. If you know how big benefit of a book, you can feel enjoy to read a publication. In the modern era like now, many ways to get book that you simply wanted.

Lisa Phelps:

As a university student exactly feel bored to reading. If their teacher expected them to go to the library or to make summary for some book, they are complained. Just very little students that has reading's internal or real their hobby. They just do what the professor want, like asked to go to the library. They go to presently there but nothing reading critically. Any students feel that examining is not important, boring as well as can't see colorful photographs on there. Yeah, it is being complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. So , this Studies in Natural Products Chemistry: Stereoselective Synthesis (Part K): 18 can make you experience more interested to read.
