Cooperative Cataloging: Shared Effort for the Benefit of All

Cooperative Cataloging: Shared Effort for the Benefit of All

Written by some of the most experienced practitioners and managers in the field of cataloging, this collection examines cooperative cataloging activities in its many forms. Containing both case studies and research studies, as well as opinion pieces, it explores the benefits and cost-effectiveness of cooperative cataloging programs such as the OCLC Enhance program, and Program for Cooperative Cataloging programs such as BIBCO, CONSER, NACO, and SACO. It also provides an introduction to less well-known cooperative efforts such as the Library of Congress National Union Catalog of Manuscript Collections (NUCMC) and the ISSN Register. Cooperative cataloging efforts offer creative opportunities for managers and administrators as they attempt to provide effective intellectual access to the rapidly increasing number of publications acquired by our libraries. This book will help such professionals to evaluate the effectiveness of cooperative efforts and apply them in their own unique circumstances.

This book was published as a special issue in *Cataloging & Classification Quarterly*.
