Current Trends in Monoclonal Antibody Development and Manufacturing: XI (Biotechnology: Pharmaceutical Aspects)

Monoclonal antibodies represent one of the fastest growing areas of new drug development within the pharmaceutical industry. Several blockbuster products have been approved over the past several years including Rituxan, Remicade, Avastin, Humira, and Herceptin. In addition, over 300 new drugs are currently in clinical trials. With both large, established biotechnology companies and small start-ups involved in the development of this important class of molecules, monoclonal antibodies products will become increasingly prevalent over the next decade.

Recently the regulatory review of monoclonal antibodies has been moved from Center for Biologics and Research to the Center for Drug Evaluation and Research (CDER) division of the US Food and Drug Administration. It is anticipated that CDER will expect a certain minimal amount of data to be provided as more of these products move through the regulatory pipeline. *Current Trends in Monoclonal Antibody Development and Manufacturing* will provide readers with an understanding of what is currently being done in the industry to develop, manufacture, and release monoclonal antibody products and what will be required for a successful regulatory submission.

From reader reviews:

Angelina Rone:

Why don't make it to be your habit? Right now, try to prepare your time to do the important work, like looking for your favorite book and reading a reserve. Beside you can solve your trouble; you can add your knowledge by the reserve entitled Current Trends in Monoclonal Antibody Development and Manufacturing: XI (Biotechnology: Pharmaceutical Aspects). Try to stumble through book Current Trends in Monoclonal Antibody Development and Manufacturing: XI (Biotechnology: Pharmaceutical Aspects) as your good friend. It means that it can being your friend when you feel alone and beside those of course make you smarter than before. Yeah, it is very fortunated to suit your needs. The book makes you more confidence because you can know almost everything by the book. So , we should make new experience and knowledge with this book.

Robert Irizarry:

This book untitled Current Trends in Monoclonal Antibody Development and Manufacturing: XI (Biotechnology: Pharmaceutical Aspects) to be one of several books which best seller in this year, this is because when you read this book you can get a lot of benefit in it. You will easily to buy that book in the book retail store or you can order it by using online. The publisher in this book sells the e-book too. It makes you more readily to read this book, since you can read this book in your Smart phone. So there is no reason for your requirements to past this guide from your list.

Philip Edwards:
