Spirals: The Pattern of Existence Geoff Ward

The extraordinary power and mystery of the spiral and its relationship to, and influence on, human evolution. Spiral energy fields are all around us and within us, patterning our very existence, from microcosm to macrocosm, determining structures from the tiny vortices of sub-atomic particles and the DNA molecule to the awesome island universes of galaxies where stars are born and conditions for life created. Now its full significance is revealed in a study that embraces molecular biology, anthropology, zoology, astronomy, quantum physics, Jungian psychology, earth mysteries, religion, philosophy and the wisdom of the ancients. Bringing fresh new insight from the cutting edge of physics and looking far back in time, Ward describes the fundamental link between the human mind and this universal form. Be amazed and fascinated by his conclusions!
