Handbook of Detection of Enzymes on Electrophoretic Gels

Gennady P. Manchenko

An appendix containing information on the buffer systems most commonly used for enzyme electrophoresis in starch, cellulose acetate, and polyacrylamide gels.

The second edition of this bestselling handbook makes significant additions to the set of reliable gene markers suitable for electrophoretic analysis. It also strengthens the value of enzyme electrophoresis as a powerful tool proven successful in solving a variety of problems encountered across many biological areas, including the post-genome biology.
