# The Origin of Species

*Charles Darwin*

**The Origin of Species** Charles Darwin  
**Introduction by Edward J. Larson**

Perhaps the most readable and accessible of the great works of scientific inquiry, *The Origin of Species* sold out its first printing on the very day it was published in 1859. Theologians quickly labeled Charles Darwin the most dangerous man in England and, as the *Saturday Review* noted, the uproar over the book quickly “passed beyond the bounds of the study and lecture-room into the drawing-room and the public street.” Based largely on Darwin’s experience as a naturalist while on a five-year voyage aboard H. M. S. *Beagle*, *The Origin of Species* set forth a theory of evolution and natural selection that challenged contemporary beliefs about divine providence and the immutability of species. This Modern Library edition includes a Foreword by the Pulitzer Prize–winning science historian Edward J. Larson, an introductory historical sketch, and a glossary Darwin later added to the original text.
