Pierre Lévy

The Semantic Sphere 1: Computation, Cognition and Information Economy Pierre Lévy

The new digital media offers us an unprecedented memory capacity, an ubiquitous communication channel and a growing computing power. How can we exploit this medium to augment our personal and social cognitive processes at the service of human development? Combining a deep knowledge of humanities and social sciences as well as a real familiarity with computer science issues, this book explains the collaborative construction of a global hypercortex coordinated by a computable metalanguage. By recognizing fully the symbolic and social nature of human cognition, we could transform our current opaque global brain into a reflexive collective intelligence.

From reader reviews:

Manuel Rodriguez:

Information is provisions for anyone to get better life, information these days can get by anyone from everywhere. The information can be a understanding or any news even an issue. What people must be consider when those information which is from the former life are challenging to be find than now's taking seriously which one works to believe or which one often the resource are convinced. If you obtain the unstable resource then you obtain it as your main information you will have huge disadvantage for you. All of those possibilities will not happen in you if you take The Semantic Sphere 1: Computation, Cognition and Information Economy as your daily resource information.

Carl Carrillo:

The reserve untitled The Semantic Sphere 1: Computation, Cognition and Information Economy is the reserve that recommended to you to study. You can see the quality of the guide content that will be shown to a person. The language that writer use to explained their way of doing something is easily to understand. The article writer was did a lot of study when write the book, therefore the information that they share for you is absolutely accurate. You also will get the e-book of The Semantic Sphere 1: Computation, Cognition and Information Economy from the publisher to make you considerably more enjoy free time.

Rose Davies:

This The Semantic Sphere 1: Computation, Cognition and Information Economy is great reserve for you because the content which is full of information for you who all always deal with world and have to make decision every minute. This specific book reveal it information accurately using great organize word or we can say no rambling sentences in it. So if you are read this hurriedly you can have whole data in it. Doesn't mean it only gives you straight forward sentences but tough core information with wonderful delivering sentences. Having The Semantic Sphere 1: Computation, Cognition and Information Economy in your hand like obtaining the world in your arm, details in it is not ridiculous just one. We can say that no publication that offer you world inside ten or fifteen minute right but this e-book already do that. So , this is certainly good reading book. Hey there Mr. and Mrs. occupied do you still doubt which?

Henry Jones:

As a scholar exactly feel bored in order to reading. If their teacher asked them to go to the library in order to make summary for some e-book, they are complained. Just minor students that has reading's heart or real their passion. They just do what the professor want, like asked to go to the library. They go to generally there but nothing reading really. Any students feel that reading through is not important, boring in addition to can't see colorful pics on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore , this The Semantic Sphere 1: Computation, Cognition and Information Economy can

make you truly feel more interested to read.
