**Spatial Technology and Archaeology: The Archaeological Applications of GIS** David Wheatley, Mark Gillings

Geographical Information Systems (GIS) and related spatial technologies have a new and powerful role to play in archaeological interpretation. Beginning with a conceptual approach to the representation of space adopted by GIS, this book examines spatial databases; the acquisition and compilation of data; the analytical compilation of data; the analytical functionality of GIS; and the creation and utilization of critical foundation data layers such as the Digital Elevation Model (DEM). The ways in which GIS can most usefully facilitate archaeological analysis and interpretation are then explored particularly as a tool for the management of archaeological resources. Formal analysis of archaeological material, and the use of trend surface, contouring and interpolation procedures are considered along with predictive modeling analysis of visibility and intervisibility. Finally there is a discussion of leading-edge issues, including three-dimensional GIS, object-oriented GIS, the relationship between GIS and 'Virtual Reality' technologies, and the integration of GIS with distributed systems and the Internet.

The approach is light, and technical detail is kept to a minimum, recognizing that most readers are simply interested in using GIS effectively. The text is carefully illustrated with worked case-studies using archaeological data. Spatial Technology and Archaeology provides a single reference source for archaeologists, students, professionals, and academics in archaeology as well as those in anthropology and related disciplines.

### **From reader reviews:**

#### **Fernande Hairston:**

Spent a free the perfect time to be fun activity to complete! A lot of people spent their free time with their family, or their friends. Usually they undertaking activity like watching television, gonna beach, or picnic in the park. They actually doing same thing every week. Do you feel it? Will you something different to fill your current free time/ holiday? Could possibly be reading a book is usually option to fill your totally free time/ holiday. The first thing that you will ask may be what kinds of reserve that you should read. If you want to try look for book, may be the guide untitled Spatial Technology and Archaeology: The Archaeological Applications of GIS can be very good book to read. May be it is usually best activity to you.

#### **Violet Jarrell:**

A lot of people always spent their particular free time to vacation or go to the outside with them household or their friend. Were you aware? Many a lot of people spent many people free time just watching TV, as well as playing video games all day long. In order to try to find a new activity here is look different you can read some sort of book. It is really fun for you personally. If you enjoy the book that you just read you can spent the entire day to reading a book. The book Spatial Technology and Archaeology: The Archaeological Applications of GIS it is very good to read. There are a lot of folks that recommended this book. These people were enjoying reading this book. If you did not have enough space to bring this book you can buy often the e-book. You can m0ore easily to read this book through your smart phone. The price is not very costly but this book possesses high quality.

#### **Norman Ross:**

This Spatial Technology and Archaeology: The Archaeological Applications of GIS is great publication for you because the content which is full of information for you who always deal with world and possess to make decision every minute. That book reveal it info accurately using great plan word or we can state no rambling sentences in it. So if you are read this hurriedly you can have whole details in it. Doesn't mean it only provides straight forward sentences but challenging core information with beautiful delivering sentences. Having Spatial Technology and Archaeology: The Archaeological Applications of GIS in your hand like getting the world in your arm, facts in it is not ridiculous a single. We can say that no publication that offer you world within ten or fifteen minute right but this e-book already do that. So , it is good reading book. Heya Mr. and Mrs. busy do you still doubt this?

#### **Danny Solberg:**

As we know that book is very important thing to add our information for everything. By a publication we can know everything you want. A book is a pair of written, printed, illustrated or even blank sheet. Every year had been exactly added. This guide Spatial Technology and Archaeology: The Archaeological Applications of GIS was filled regarding science. Spend your spare time to add your knowledge about your scientific

disciplines competence. Some people has various feel when they reading the book. If you know how big advantage of a book, you can truly feel enjoy to read a e-book. In the modern era like at this point, many ways to get book that you wanted.
