Analysis of Capture-Recapture Data (Chapman & Hall/CRC Interdisciplinary Statistics)

Rachel S. McCrea, Byron J. T. Morgan

Analysis of Capture-Recapture Data (Chapman & Hall/CRC Interdisciplinary Statistics) Rachel S. McCrea, Byron J. T. Morgan

An important first step in studying the demography of wild animals is to identify the animals uniquely through applying markings, such as rings, tags, and bands. Once the animals are encountered again, researchers can study different forms of capture-recapture data to estimate features, such as the mortality and size of the populations. Capture-recapture methods are also used in other areas, including epidemiology and sociology.

With an emphasis on ecology, **Analysis of Capture-Recapture Data** covers many modern developments of capture-recapture and related models and methods and places them in the historical context of research from the past 100 years. The book presents both classical and Bayesian methods.

A range of real data sets motivates and illustrates the material and many examples illustrate biometry and applied statistics at work. In particular, the authors demonstrate several of the modeling approaches using one substantial data set from a population of great cormorants. The book also discusses which computer programs to use for implementing the models and contains 130 exercises that extend the main material. The data sets, computer programs, and other ancillaries are available at www.capturerecapture.co.uk.

The book is accessible to advanced undergraduate and higher-level students, quantitative ecologists, and statisticians. It helps readers understand model formulation and applications, including the technicalities of model diagnostics and checking.

From reader reviews:

Cassie Merritt:

The knowledge that you get from Analysis of Capture-Recapture Data (Chapman & Hall/CRC Interdisciplinary Statistics) may be the more deep you digging the information that hide into the words the more you get considering reading it. It doesn't mean that this book is hard to recognise but Analysis of Capture-Recapture Data (Chapman & Hall/CRC Interdisciplinary Statistics) giving you thrill feeling of reading. The copy writer conveys their point in certain way that can be understood by anyone who read this because the author of this reserve is well-known enough. This book also makes your current vocabulary increase well. Making it easy to understand then can go along, both in printed or e-book style are available. We highly recommend you for having that Analysis of Capture-Recapture Data (Chapman & Hall/CRC Interdisciplinary Statistics) instantly.

Charles Valentine:

This Analysis of Capture-Recapture Data (Chapman & Hall/CRC Interdisciplinary Statistics) usually are reliable for you who want to become a successful person, why. The main reason of this Analysis of Capture-Recapture Data (Chapman & Hall/CRC Interdisciplinary Statistics) can be one of the great books you must have is giving you more than just simple studying food but feed you with information that maybe will shock your previous knowledge. This book is definitely handy, you can bring it everywhere and whenever your conditions at e-book and printed ones. Beside that this Analysis of Capture-Recapture Data (Chapman & Hall/CRC Interdisciplinary Statistics) giving you an enormous of experience including rich vocabulary, giving you test of critical thinking that could it useful in your day task. So , let's have it and revel in reading.

Patricia Baker:

Your reading 6th sense will not betray an individual, why because this Analysis of Capture-Recapture Data (Chapman & Hall/CRC Interdisciplinary Statistics) publication written by well-known writer who knows well how to make book that could be understand by anyone who have read the book. Written inside good manner for you, dripping every ideas and writing skill only for eliminate your own hunger then you still doubt Analysis of Capture-Recapture Data (Chapman & Hall/CRC Interdisciplinary Statistics) as good book not just by the cover but also by content. This is one guide that can break don't ascertain book by its include, so do you still needing another sixth sense to pick this kind of!? Oh come on your reading sixth sense already told you so why you have to listening to another sixth sense.

Lauren Zavala:

Many people said that they feel bored stiff when they reading a guide. They are directly felt that when they get a half regions of the book. You can choose the actual book Analysis of Capture-Recapture Data (Chapman & Hall/CRC Interdisciplinary Statistics) to make your current reading is interesting. Your own skill of reading skill is developing when you including reading. Try to choose very simple book to make you

enjoy to read it and mingle the sensation about book and reading through especially. It is to be first opinion for you to like to open up a book and go through it. Beside that the guide Analysis of Capture-Recapture Data (Chapman & Hall/CRC Interdisciplinary Statistics) can to be your friend when you're feel alone and confuse in what must you're doing of the time.
