DIY Satellite Platforms: Building a Space-Ready General Base Picosatellite for Any Mission Sandy Antunes

Want to build your own satellite and launch it into space? It's easier than you may think. The first in a series of four books, this do-it-yourself guide shows you the essential steps needed to design a base picosatellite platform—complete with a solar-powered computer-controlled assembly—tough enough to withstand a rocket launch and survive in orbit for three months.

Whether you want to conduct scientific experiments, run engineering tests, or present an orbital art project, you'll select basic components such as an antenna, radio transmitter, solar cells, battery, power bus, processor, sensors, and an extremely small picosatellite chassis. This entertaining series takes you through the entire process—from planning to launch.

- Prototype and fabricate printed circuit boards to handle your payload
- Choose a prefab satellite kit, complete with solar cells, power system, and on-board computer
- Calculate your power budget—how much you need vs. what the solar cells collect
- Select between the Arduino or BasicX-24 onboard processors, and determine how to use the radio transmitter and sensors
- Learn your launch options, including the providers and cost required
- Use milestones to keep your project schedule in motion

From reader reviews:

Ruben Martin:

Nowadays reading books are more than want or need but also be a life style. This reading addiction give you lot of advantages. The huge benefits you got of course the knowledge the particular information inside the book in which improve your knowledge and information. The info you get based on what kind of reserve you read, if you want have more knowledge just go with training books but if you want experience happy read one with theme for entertaining like comic or novel. The DIY Satellite Platforms: Building a Space-Ready General Base Picosatellite for Any Mission is kind of book which is giving the reader unstable experience.

Tom Johnson:

This book untitled DIY Satellite Platforms: Building a Space-Ready General Base Picosatellite for Any Mission to be one of several books this best seller in this year, here is because when you read this e-book you can get a lot of benefit on it. You will easily to buy this book in the book retail outlet or you can order it by using online. The publisher with this book sells the e-book too. It makes you more easily to read this book, as you can read this book in your Touch screen phone. So there is no reason for your requirements to past this guide from your list.

John Thornton:

The actual book DIY Satellite Platforms: Building a Space-Ready General Base Picosatellite for Any Mission will bring someone to the new experience of reading a new book. The author style to clarify the idea is very unique. When you try to find new book to learn, this book very ideal to you. The book DIY Satellite Platforms: Building a Space-Ready General Base Picosatellite for Any Mission is much recommended to you to see. You can also get the e-book in the official web site, so you can more easily to read the book.

Bonnie Vassallo:

On this era which is the greater person or who has ability to do something more are more valuable than other. Do you want to become among it? It is just simple strategy to have that. What you need to do is just spending your time not much but quite enough to enjoy a look at some books. On the list of books in the top list in your reading list is actually DIY Satellite Platforms: Building a Space-Ready General Base Picosatellite for Any Mission. This book that is qualified as The Hungry Mountains can get you closer in getting precious person. By looking up and review this e-book you can get many advantages.
