This comprehensive guide to macroscopic findings in the mouth covers anatomic variants, congenital and developmental abnormalities and pathologic findings - all are demonstrated with colour photographs and their clinical presentation is discussed. Short guidelines for differential diagnosis, laboratory tests and treatment accompany the text where appropriate. New for this edition are: two chapters on HIV infections and AIDS, and renal diseases; 64 illustrations of lesions and clinical entities affecting the oral cavity; several illustrations of diseases have been added to broaden the spectrum of clinical presentation; and many illustrations have been replaced by new ones of higher quality. This atlas should help clinicians to solve diagnostic problems and to outline treatment.
