Beyond Conservation: A Wildland Strategy Peter Taylor

After decades of operating off-the-backfoot and protecting and conserving nature perceived as under threat, conservationists are becoming proactive and creative in the face of habitat loss, agricultural intensification and climate change. Beyond Conservation offers a revolutionary agenda for both managing existing wildlands in Britain and for expanding and connecting such lands. Central to this strategy is the imperative to 'rewild' or restore and repair damaged habitat and ecosystems, promote existing biodiversity and reintroduce vanished plant and animal species, while working to reconcile human needs and livelihoods and the needs of nature.
