## Optical Radiometry for Ocean Climate Measurements, Volume 47 (Experimental Methods in the Physical Sciences)

This book presents the state-of-the-art of optical remote sensing applied for the generation of marine climate-quality data products, with contributions by international experts in the field. The chapters are logically grouped into six thematic parts, each introduced by a brief overview. The different parts include: *i.* requirements for the generation of climate data records from satellite ocean measurements and additionally basic radiometry principles addressing terminology, standards, measurement equation and uncertainties; *ii.* satellite visible and thermal infrared radiometry embracing instrument design, characterization and, pre- and post-launch calibration; *iii.* *in situ* visible and thermal infrared radiometry including overviews on basic principles, technology and measurements methods required to support satellite missions devoted to climate change investigations; *iv.* simulations as fundamental tools to support interpretation and analysis of both *in situ* and satellite radiometric measurements; *v.* strategies for *in situ* radiometry to satisfy mission requirements for the generation of climate data records; and finally, *vi.* methods for the assessment of satellite data products.

Fundamentals of measurement theory are taken through to implementation of practical ground based radiometers and their application to validate satellite data used to generate climate data records. This book presents practical solutions for those involved or contemplating the validation of optical climate measurements from satellite instruments.

- Exhaustive coverage of important topics
- Fundamental and advanced discussions of many types of instruments
- Emphasis on calibration and uncertainty analysis of results

### **From reader reviews:**

#### **Jon Farris:**

What do you consider book? It is just for students because they are still students or that for all people in the world, the particular best subject for that? Only you can be answered for that problem above. Every person has distinct personality and hobby per other. Don't to be forced someone or something that they don't want do that. You must know how great and important the book Optical Radiometry for Ocean Climate Measurements, Volume 47 (Experimental Methods in the Physical Sciences). All type of book would you see on many sources. You can look for the internet solutions or other social media.

#### **Karl Irwin:**

A lot of people always spent all their free time to vacation or go to the outside with them family members or their friend. Were you aware? Many a lot of people spent many people free time just watching TV, or perhaps playing video games all day long. If you wish to try to find a new activity honestly, that is look different you can read some sort of book. It is really fun for you personally. If you enjoy the book which you read you can spent 24 hours a day to reading a publication. The book Optical Radiometry for Ocean Climate Measurements, Volume 47 (Experimental Methods in the Physical Sciences) it doesn't matter what good to read. There are a lot of folks that recommended this book. They were enjoying reading this book. Should you did not have enough space to develop this book you can buy the e-book. You can m0ore simply to read this book through your smart phone. The price is not too expensive but this book offers high quality.

#### **Peter Delaune:**

Reading can called head hangout, why? Because when you are reading a book specifically book entitled Optical Radiometry for Ocean Climate Measurements, Volume 47 (Experimental Methods in the Physical Sciences) your head will drift away trough every dimension, wandering in every aspect that maybe mysterious for but surely might be your mind friends. Imaging every single word written in a e-book then become one type conclusion and explanation that will maybe you never get previous to. The Optical Radiometry for Ocean Climate Measurements, Volume 47 (Experimental Methods in the Physical Sciences) giving you another experience more than blown away the mind but also giving you useful information for your better life on this era. So now let us show you the relaxing pattern this is your body and mind is going to be pleased when you are finished looking at it, like winning an activity. Do you want to try this extraordinary investing spare time activity?

#### **Lawrence Wilson:**

What is your hobby? Have you heard in which question when you got college students? We believe that that concern was given by teacher with their students. Many kinds of hobby, Every person has different hobby. So you know that little person just like reading or as studying become their hobby. You have to know that reading is very important as well as book as to be the point. Book is important thing to provide you

knowledge, except your current teacher or lecturer. You see good news or update regarding something by book. Many kinds of books that can you choose to adopt be your object. One of them is actually Optical Radiometry for Ocean Climate Measurements, Volume 47 (Experimental Methods in the Physical Sciences).
