Sarbanes-Oxley IT Compliance Using Open Source Tools Christian B Lahti, Roderick Peterson

The Sarbanes-Oxley Act (officially titled the Public Company Accounting Reform and Investor Protection Act of 2002), signed into law on 30 July 2002 by President Bush, is considered the most significant change to federal securities laws in the United States since the New Deal. It came in the wake of a series of corporate financial scandals, including those affecting Enron, Arthur Andersen, and WorldCom. The law is named after Senator Paul Sarbanes and Representative Michael G. Oxley. It was approved by the House by a vote of 423-3 and by the Senate 99-0. This book illustrates the many Open Source cost-saving opportunities that public companies can explore in their IT enterprise to meet mandatory compliance requirements of the Sarbanes-Oxley act. This book will also demonstrate by example and technical reference both the infrastructure components for Open Source that can be made compliant, and the Open Source tools that can aid in the journey of compliance. Although many books and reference material have been authored on the financial and business side of Sox compliance, very little material is available that directly address the information technology considerations, even less so on how Open Source fits into that discussion. The format of the book will begin each chapter with the IT business and executive considerations of Open Source and SOX compliance. The remaining chapter verbiage will include specific examinations of Open Source applications and tools which relate to the given subject matter.

All disc-based content for this title is now available on the Web.

* Only book that shows companies how to use Open Source tools to achieve SOX compliance, which dramatically lowers the cost of using proprietary, commercial applications. * Only SOX compliance book specifically detailing steps to achieve SOX compliance for IT Professionals.

This great information can easily drawn you into completely new stage of crucial pondering.

Arlene Farrar:

As a university student exactly feel bored for you to reading. If their teacher inquired them to go to the library as well as to make summary for some e-book, they are complained. Just small students that has reading's heart and soul or real their hobby. They just do what the trainer want, like asked to the library. They go to presently there but nothing reading critically. Any students feel that reading through is not important, boring as well as can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this era, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore , this Sarbanes-Oxley IT Compliance Using Open

Source Tools can make you sense more interested to read.
