Optimization of Wood Fuel Chips Production in Denmark Brice Assimizele

The increased use of wood chips at centralized power plants is an important initiative in the field of biomass in Denmark. In order to cope with the unbalanced supply and demand, the supplier of wood fuel stores 20% of its inventories for a period of time at the storage terminal. A variant of the production, inventory, distribution, routing problem (PIDRP) is developed in this book to describe the production and distribution of wood chips. The work is focused on reducing the high inventory and routing cost by optimizing the production planning in the forest which is divided into different districts and different stands within each district. A mix integer programming model is developed to make a yearly production plan with minimal inventories costs between districts. In addition, a 2-opt tabu search with best improvement solution method is used for intra-districts routing planning. Computational results show great inventory and routing costs saving opportunity for the supplier of wood chips. The book can be used as a mathematical programming and heuristic case study for master level students. The methods used provide insight to supply chain managers faced with related challenges.

From reader reviews:

Sally Oneal:

Inside other case, little men and women like to read book Optimization of Wood Fuel Chips Production in Denmark. You can choose the best book if you love reading a book. So long as we know about how is important a book Optimization of Wood Fuel Chips Production in Denmark. You can add information and of course you can around the world by a book. Absolutely right, mainly because from book you can understand everything! From your country until foreign or abroad you will find yourself known. About simple point until wonderful thing it is possible to know that. In this era, we are able to open a book or maybe searching by internet device. It is called e-book. You should use it when you feel fed up to go to the library. Let's go through.

Kevin Swafford:

The reason why? Because this Optimization of Wood Fuel Chips Production in Denmark is an unordinary book that the inside of the publication waiting for you to snap that but latter it will jolt you with the secret it inside. Reading this book beside it was fantastic author who all write the book in such incredible way makes the content inside easier to understand, entertaining means but still convey the meaning completely. So , it is good for you for not hesitating having this any longer or you going to regret it. This excellent book will give you a lot of benefits than the other book include such as help improving your expertise and your critical thinking technique. So , still want to hesitate having that book? If I ended up you I will go to the reserve store hurriedly.

Bridget Dell:

Optimization of Wood Fuel Chips Production in Denmark can be one of your beginning books that are good idea. We recommend that straight away because this reserve has good vocabulary that can increase your knowledge in vocab, easy to understand, bit entertaining however delivering the information. The author giving his/her effort to place every word into joy arrangement in writing Optimization of Wood Fuel Chips Production in Denmark yet doesn't forget the main level, giving the reader the hottest along with based confirm resource details that maybe you can be among it. This great information may drawn you into brand-new stage of crucial considering.

Lane James:

Are you kind of busy person, only have 10 or perhaps 15 minute in your day to upgrading your mind proficiency or thinking skill possibly analytical thinking? Then you are experiencing problem with the book when compared with can satisfy your short period of time to read it because all this time you only find reserve that need more time to be go through. Optimization of Wood Fuel Chips Production in Denmark can be your answer since it can be read by a person who have those short spare time problems.
